EDUCATION

University of California, Santa Cruz

SEPTEMBER 2017 - DECEMBER 2020

Bachelor of Science, Computer Engineering

- Dean's Honors List Spring Quarter 2018
- Courses Taken: Data Structures, Algorithms & Abstract Data Types, Computer Architecture, Electronic Circuits, Multivariable Calculus, Applied Discrete Mathematics, Technical Writing, Python Programming, C Programming

SKILLS

Languages: Java, C, Python, JavaScript, HTML5, CSS3

Technologies: Git, Bash, Unix

Spoken Languages: English, Vietnamese, Spanish

PROJECTS

N-Queens Solution Generator — Java, Unix

- Calculates the answers to a chessboard problem in which no 2 queens can be on the same row, column, or diagonal, with user input n as the number of queens
- Utilizes 2D arrays, recursion, iteration & error checking

Matrix Calculator — Java, Unix

View on [GitHub](#)

- Performs fast matrix operations such as addition, subtraction, multiplication, exponentiation, and transposition
- Uses a space- and time-efficient object List Abstract Data Type (ADT) to represent matrices

Calculator — Javascript, HTML5, CSS3

Try in [Browser](#) | View on [GitHub](#)

- Performs all basic math operators: addition, subtraction, multiplication, division
- Originally designed with CSS3 & has keyboard functionality

Alphabetizer — C, Unix

View on [GitHub](#)

- Sorts any list of words from a txt file into alphabetical order
- Uses an integer List ADT to represent words that are organized in a bi-directional Queue ADT

EXPERIENCE

Camp Galileo, Milpitas — Team Leader & Summer Intern

JUNE 15 – JULY 27, 2018 & 2019

- Led 12 groups of 20 pre-K to 5th grade campers each in art, science, and outdoor play over the course of a 6 week curriculum plan
- Collaborated with 14 instructors to develop classroom management skills & teaching techniques & more efficiently educate students in a fast-paced environment
- Handled inquiries & facilitated discussions between camp families & staff management

Cal Teach, Santa Cruz — Intern

NOVEMBER 9, 2018 - MARCH 22, 2019

- Guided 2 middle school classrooms with 60 7/8th grade students in Java coding projects & assignments by asking leading questions, explaining concepts, and writing pseudocode
- Taught 3 introductory lessons about coding basics such as plotting points, drawing shapes, and creating moving images
- Adjusted to using new Javascript programming IDE CodeNaturally in the classroom
- Held weekly meetings with host teacher to better implement new effective teaching strategies, resulting in a 6% average project grade increase

ACTIVITIES

Society of Asian Scientists & Engineers (SASE)

OCTOBER 2017 - PRESENT

Vietnamese Student Association (VSA)

OCTOBER 2018 – PRESENT

Society of Women Engineers (SWE)

OCTOBER 2019 – PRESENT
